Sachin Bhapkar

Java Backend Engineer | Spring Boot | Spring Cloud | Microservices | AWS

9022093206 | sachbhapkar@gmail.com | Pune, India | linkedin.com/in/sachinbhapkar

PROFESSIONAL OVERVIEW

Java backend engineer with 4.5+ years of experience building and scaling Spring Boot and Spring Cloud microservices. Led a 3-member core platform team at Persistent Systems, owning gateway migration (Zuul to Spring Cloud Gateway), Java 17 and Spring Boot 3.4.x upgrades, distributed tracing, backup/restore tooling, and tenant lifecycle automation across a 40+ team microservice ecosystem. Hands-on with REST API design, Redis/ElastiCache, HashiCorp Vault, Docker, Jenkins, AWS (Lambda, API Gateway, S3, PostgreSQL), observability, and application security remediation.

WORK EXPERIENCE

SOFTWARE ENGINEER | Principal Global Services, Pune, India MAR 2026 - PRESENT

- Built and integrated 10+ serverless REST APIs on AWS API Gateway and Lambda, adopted by an internal engineering team of 10+.
- Helped modernize a legacy 32-bit Microsoft Access application by migrating and consolidating 200+ source tables into 50+ AWS PostgreSQL tables.
- Built Lambda-based KYC data extraction from PostgreSQL to CSV delivered to Amazon S3, feeding downstream sanction-screening workflows.
- Remediated CodeQL, CSPM, and AVA security findings across Java applications and AWS environments, improving security and compliance posture.

LEAD SOFTWARE ENGINEER | Persistent Systems, Pune, India May 2022 - Feb 2026

Joined as Software Engineer at Operative Media; Pune organization subsequently rebadged under Persistent Systems.

- Led a 3-member core platform team responsible for foundational microservices, backend architecture, and scalability/performance improvements.
- Migrated legacy Zuul Gateway to Spring Cloud Gateway and modernized Spring Cloud microservices to Java 17 and Spring Boot 3.4.x, with performance and security optimizations.
- Implemented the BackupRestore service supporting 50+ microservices across 5+ data stores and introduced Zipkin tracing, improving observability across 40+ microservice teams.
- Developed a backend application to automate tenant lifecycle management, reducing manual effort by 90%+ and improving integration efficiency.
- Automated API-key rotation using HashiCorp Vault, reducing manual effort by 90%+; also owned tenant provisioning/refresh and contributed to Redis ElastiCache migration and FOSSA compliance remediation.

EDUCATION

Bachelor of Technology in Computer Science & Engineering | G H Raisoni College of Engineering and Management, Pune, India Graduated: May 2020

SKILLS

Java, Spring Boot, Spring Cloud, Microservices, REST APIs, System Design, Apache Kafka, Bash, AWS, Git, Linux, Docker, Jenkins, HashiCorp Vault, Swagger, Postman, SonarQube, JUnit, Kibana, New Relic, MySQL, Redis
